Introduction

A chatbot is a computer program that can converse with humans using AI in messaging platforms. Every time the chatbot gets input from the user it saves input and response which helps the chatbot with little initial knowledge to evolve using gathered responses.

The AI-powered chatbot, we are going to develop will be a text-based conversational agent capable of understanding and generating human-like responses. It can be integrated into websites, messaging platforms, or standalone applications. This chatbot can be trained to provide information, answer frequently asked questions, or engage in casual conversation with users.

PROBLEM

- It's quite common for people to visit new sites daily and they might face problems navigate through the website, or if there is any registration process, they might get puzzled with various doubts. This is where our AI Chatbot will be a game changer.
- The main motive is to create a chatbot that consistently offers accurate and helpful responses, continuously learning from interactions, and evolving to be a reliable resource for future projects.

SOLUTION

Our team is indulge in creating a ChatBot that consistently offers accurate and helpful responses, continuously learning from interactions, and evolving to be a reliable resource for future projects.

A Chatbot allows a user to simply ask questions in the same manner that they would address a human.

Types Of ChatBot

Rule Based ChatBot

The rules-based chatbot employs conditional if/then logic to act on predefined combinations of question-and-answer options.

Generative ChatBot

The next gen chatbots with generative AI capabilities that offers even more enhanced functionality through their fluency in understanding common language

AI Powered ChatBot

With AI and natural language understanding (NLU) capabilities, the AI bot can quickly detect all relevant contextual information shared

Features of AI-ChatBot

**Enhanced User
Experience**

**24/7
Availability**

**Efficient
Customer
Support**

Scalability

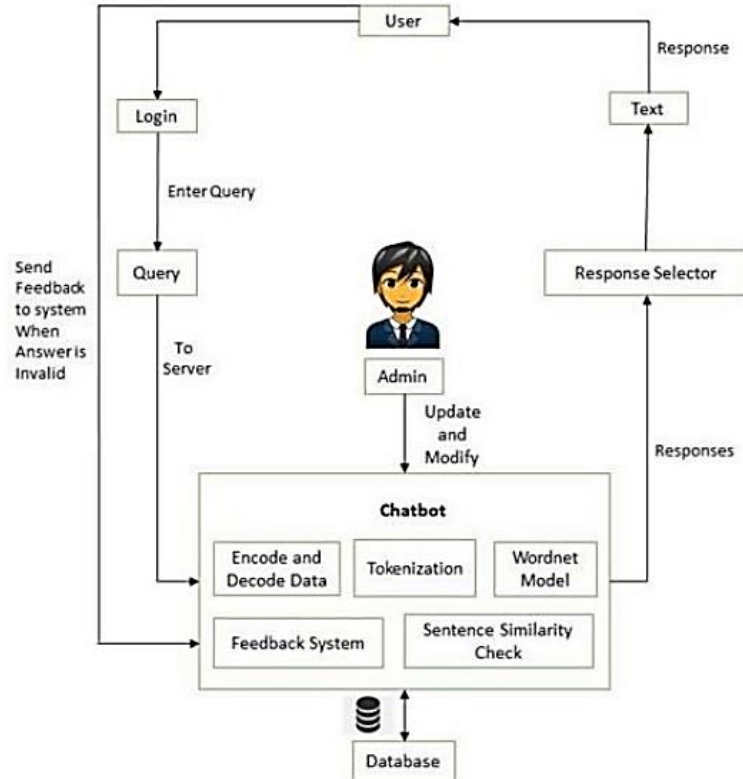

**Integration
With Platform**

Cost Effective

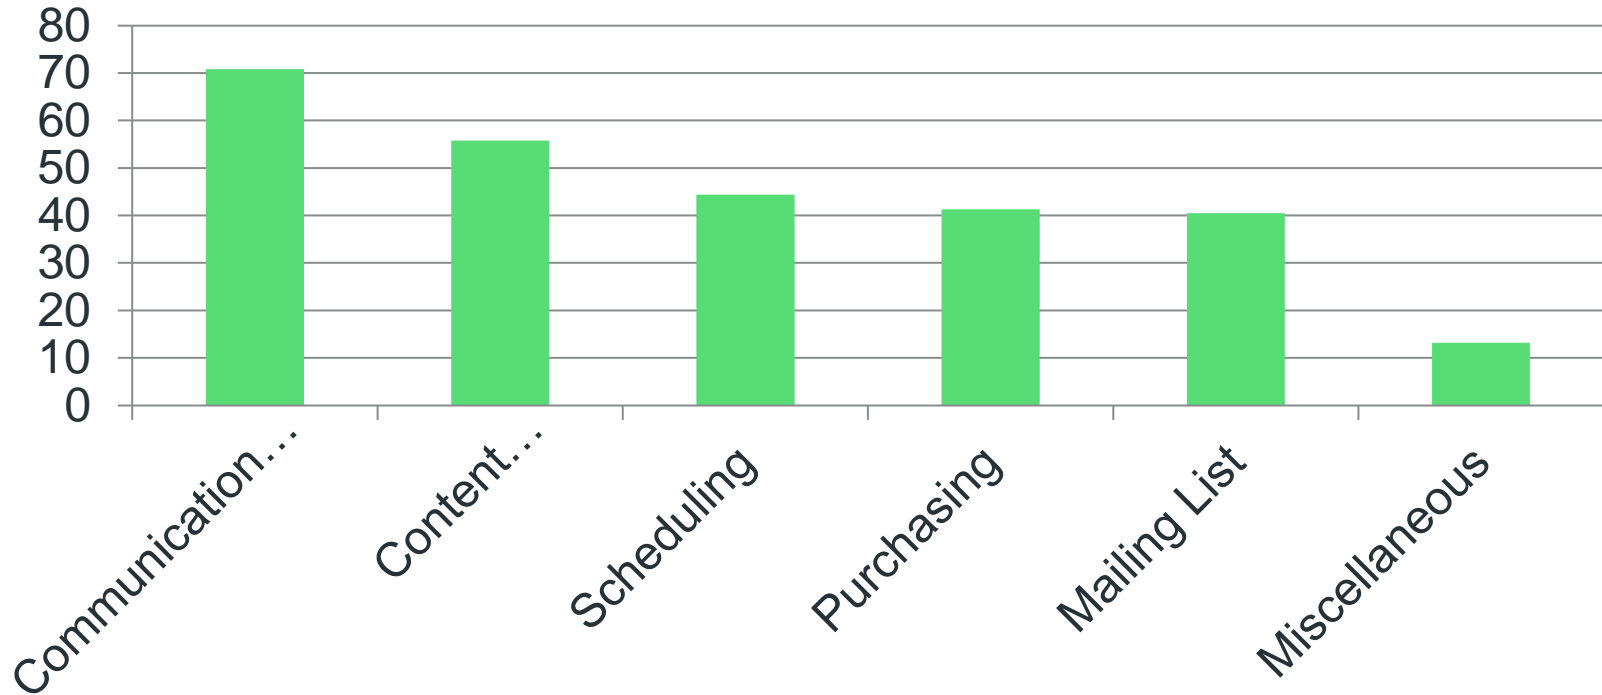

Flow Chart

Acceptance Of AI ChatBot

By Customers and Industries
